

Do you know someone living with Tourette's?

We are looking for adults living with Tourette's to participate in a research study comparing the sounds of speech and vocal tics.

WHO: Anyone over 18 who has been diagnosed with Tourette's syndrome is invited to participate.

WHAT: You will be recorded performing different speech tasks like describing a picture, reading some sentences and telling a story about yourself. You will be asked to tic freely during recordings. There will be two recording sessions, 3 hours the first day and 2 hours the second.

WHERE: A location of your choosing where you feel comfortable. Recording can take place anywhere as the researcher will travel to you. If you prefer, the researcher can make necessary location arrangements for you.

BENEFIT/RISK:

There are no direct medical benefits or risks that you expose yourself to by participating.

COMPENSATION:

\$20/hour
