DOES YOUR WORK INVOLVE TOURETTE'S SYNDROME?

Deep brain stimulation is an emerging therapy for severe Tourette's. We want to know what you think about it - complete our web survey to help further progress in the treatment of Tourette's.

- All information will be collected anonymously
- Survey takes 5-10 minutes of your time
- Interested? Follow this link: https://www.surveymonkey.com/r/PatientBeta3
